This application is not a private server. It allows you to download and install it.Atrasis is a private server of one of the biggest mobile games, Clash of Clans. It allows you to obtain unlimited gems and resources.Features - Unlimited Gems- Clan Wars- Challenges- Super Troops- Custom Mods / No Mods- Clan Games - Lords Mobile: Tower Defense Developer: IGG.COM Price: Free+ Lords Mobile - "Lords Mobile Mod Apk" is a fantastic new strategy for playing the role of the IGG studio for Android devices, which has famous games such as CASTLE CLASH in its work and is a famous studio! In this game, like other Android games, you have to create your own empire in a world full of chaos, and build up your military counterpart by collecting strange heroes and get ready to plunder other users around the world! HD graphics, very beautiful sound, great design, Lords Mobile Hack is any tool, app, modification, software or means for players to gain unfair advantages, automate gameplay, get more free gems, diamonds, stamina (hearts) and resources as well as other goodies. While there is a variety of ways to cheat and get around the rules on Android and iOS alike, hacks or generators for unlimited free resources, gems, diamonds, free purchases and money do not exist and are always fake. Lords Mobile Hacks & Mods Hacks come in different ways: The most popular kind of hack for Lords Mobile is to use modded game files or mods, such as APKs for Android or IPAs for iOS to enable cheats without having to use any advanced tools that would require a rooted device. Modded game files allow for auto collecting rewards, chests, automatically helping all guild members for guild coins, auto research, building and speedhacks. Where Lords Mobile hacks are limited is your account data. Trainers for unlimited gems, gold, wood and other resources or items / troops are impossible to make, as this is an online multiplayer city builder game, which means that your account data including your VIP level, gems, heroes, hearts and so on are stored on the game servers belonging to IGG.com and cannot possibly be changed using any tools. The only ones who could potentially give you gems would be the actual game administrators. Lords Mobile Bots Bots are arguably the best and most powerful method of cheating besides game modding, allowing you to get more resources, research, troops and gems in the game. A bot is in essence a program or app that is run either on your mobile phone or on your PC and will either automatically play the game by sending data directly to the game servers or by actually opening the game on your phone/tablet or emulator and play it manually. So a bot will be able to perform simple and more complicated tasks, such as auto researching, auto scouting, auto helping in the guild, auto hero stage completion, fight battles with your heroes and use their special abilities, produce troops, attack players, support guild rallies and a lot more. In essence a good Lords Mobile bot will be able to farm resources, gems, materials for crafting, experience and even VIP points over time without you even having to play the game yourself at all. Bots can be run through your actual phone (iOS or Android), or an emulator or can be made yourself by setting up a macro recorder and editor in order to bot the game manually through any kind of emulator able to run Lords Mobile. Mod Menus Mod Menus are the cream of the crop when it comes to cheating methods in Lords Mobile, allowing the user to access an in-game cheat menu to customize the hack and enable or disable individual features at any time easily. Lords Mobile mod menus are just as easy to install as any other mod: Simply download the modified game file, install it, follow the instructions at the download page to replace OBB files or make other small adjustments and you are done installing the game mod. Installation of mods may require a root or jailbroken device, but you can always use an Android emulator or iOS emulator (currently does not exist) to easily get a mobile device with root access and minimize your risk or bricking your phone or tablet, which we do highly recommend you do. Using Cheats Safely It is highly recommended that you first test any cheat, bot or hack, game hacking tools of other method on an alt account and not your main account. Using hacks can get you banned from lords mobile and not even a lv1 15 VIP will save you from automated bans. Also it is recommended testing cheats on emulators first in addition to using an alt account and always make sure to revisit the place you downloaded your Lords Mobile hack and make sure the file is still working and up to date. Udate any mods you are using and do not use outdated or potentially detected mods. Overall, it is quite easily possible to cheat safely, but you will need to spend the time to make sure your cheats are still up to date every time you play. VIP, Diamonds and Gems Hacks While it is possible to set up bots to automatically farm gems for you over time and max your account, hacks for unlimited free gems or VIP levels do not exist. - This is due to the unfortunate fact that all your account data is stored on the game servers, which cannot be hacked using any means, much less legal means. Any site, generator, tool or video that claims to give you free gems is fake and will probably try to scam you into completing human verification. In the end you will get nothing, because this kind of cheat is absolutely impossible. The only people able to give you free gems are the developers, but they want to sell them to make money, so this is not going to happen either. Of course you can always be a good person and spend money on the game. Or you can just use bots. Exploits & Glitches Exploiting is the use of temporary game bugs in order to gain an advantage, more resources such as gems, resources, gold / money, vip level 15, gear, stamina, free chests and other goodies. The great thing about exploits when compared to other cheating methods is that is generally requires no root and no jailbrake in order to work. - However, since the bugs making glitching and exploiting possible are temporary in natures, the cheat becomes impossible once the developers of Lords Mobile hotfix the issue. But for as long as exploiting and glitching is possible, it has the potential to make impossible cheats, such as unlimited money, damage hacks, item duplication, free purchases and other great features possible for a limited time. So it pays to keep an eye on the relevant game hacking forums and catch exploits before they get fixed.
